

Bishop Creek Hydroelectric System Relicensing Operations Model Workshop

Meeting Objectives

1. Explain how the model works and how to interpret its outputs
2. Use the model to illustrate constraints in the Bishop Creek system
3. Build agreement around the model's functionality, accuracy, and limitations, so that it can be used in PM&E development going forward

Note: This meeting is intended to build understanding of the Operation Model as a tool. It is NOT intended to discuss proposed flows or PM&Es. Those discussions will begin later in the fall.

Meeting Agenda

There will be an opportunity for Q&A after each agenda item.

- 12:00 pm: **Introductions & agenda review**
- 12:10 pm: **Review of Operations Model Study goals and objectives**
- 12:15 pm: **Review of Operations Model Technical Report, including overview of the model**
Introduce model assumptions, inputs, accuracy & limitations
- 12:35 pm: **Demonstration of the Operations Model**
Explore the tool using baseline and example flow scenarios
- 1:50 pm: **Action items & next steps**
